

What Parents Say

"Chances are your child won't even realize they are practicing because the entire program feels more like a fun reward!"

-Tere Scott, Homeschool Blogger

"One of the best things that they like is when they are asked to create their own music. It brings out their creativity and allows them to practice all they have learned."

-Chris, Blog Owner, The Mommy Journey

"My children have had no prior music instruction but they are lining up for their piano lessons. Having taken years of lessons as a child myself, I know this is NOT normal! It's been so much fun to watch them learn, to enjoy their time, and beg for more. I can't wait to see how far this takes them!"

-Adrienne, a Homeschooling Mother of Six

"As I write this review, my son has asked five times if I will go set the keyboard and laptop up, so he can do his next lesson, "NOW, please?"; LOL! Now, THAT'S the sort of response I love to get when it comes to educational products, because it means they are learning with fun, not with drudgery. As my husband likes to call it, it's "stealth" education!"

-Lori, 'Journey Through Life' Homeschool Blogger

"It is so much more than teaching your child how to play the keyboard. They are taught by (and in the process learn about) famous composers. They have an opportunity to learn about and listen to famous classical music. I love the interactive feature of the lessons. Children are given immediate feedback as they complete the task they are asked to do. I love that they get to compose their own songs in the lessons and hear them played back to them."

-Lisa and Art, 'Happy Homeschool Mom' Blog

"I love how comprehensive the program is, how it engages the younger ones, and how the older ones seem to be learning quite a bit. My absolute favorite aspect is how the keyboard hooks up to the computer and allows instant feedback on their playing ability. This is awesome! Seriously. It's one thing to think you are doing something right, and it's another to have the computer catch mistakes or show success."

-Audra Marie, Home Educator

"I still have the image in my head of my sweet girl in her nightgown, in the midst of a lesson. She was standing up and had herself staged like a rock star at the keyboard while composing her own song. The delight on her face was obvious. She was having a blast!"

-Laurie Gauger, Home Educator

"My 5-year-old twins really loved their MusIQ class at Springvale Elementary. Heidi is a wonderful teacher. Will you be offering it in the fall and throughout the year this year? I am hoping so, the after school format was fantastic and they really enjoyed themselves. I'd like to put them in it throughout the school year."

On Sunday in the car, I put on Vivaldi's Four Seasons and they were asking what it was, so I told them, and my daughter said, "Oh! He taught us piano! Thanks!"

-Alexandra Allen, MusIQ Club Parent

“My son and daughter both started primary at Astral Drive Elementary School this year. I had heard wonderful reviews about the MusIQ program from both parents and students at the school and thought we would try the program for a session to see for ourselves.

We were more than happy with the results! My children can be shy to enter new situations; however the instructor was very comfortable working with younger children and put their minds at ease right away. The advantage for us was having the program offered at their school during the lunch hour. This allowed the kids to see familiar faces and make new friends, which was very comforting to them. As a parent, it was particularly convenient because they are able to complete an extra-curricular activity during the school day which leaves more time for family after school and on the weekends.

The kids LOVED coming home and telling us about using the computers with the keyboards and were excited to show us songs they composed themselves. They are developing a true appreciation for music and they have impressed me with how quickly they are learning to read music.

I have had the pleasure of speaking with MusIQ Director a number of times and his patience with me has been unwavering. From questions about the program itself, to sibling discounts offered and payment schedules, he has been more than reasonable in every interaction and has made me feel confident that he does all he can to ensure the children enrolled in this program have a positive experience.

We have now registered our children for their second session which they were thrilled about. I am sure this will not be the last! Thank you for making this program available for my children!”

-Karen McGrath, Teacher Astral Drive Elementary, Cole Harbour, Nova Scotia

“The folks at Adventus have done an incredible job of combining piano instruction with music theory, ear training, and music history all rolled into one. I have never seen a product like this before. I can not begin to tell you how impressed I am with this product. My formal education actually includes a Bachelor of Arts degree in Music Therapy. In having taken piano, music theory, ear training, and music history in college, I can truly say that if your family were to fully utilize the features in this program, your children and you would have a solid foundation in music!”

-Gary and Dawn Oaks, 'Double O Farms'Homeschool Blog

“I struggle even as I type because I know the words I write in this blog post will not adequately explain just how much your children and even you can learn from this program. Every member of your family can begin to learn to read music, music theory, rhythm, music history, and yes of course piano skills with this program. Even the adults. The software is so detailed that it trains you to play with such precision that no human instructor could ever manage.”

- Crystal Starr, Business Owner, Home Educator

“My daughter absolutely loved her class last week! She said she wished everyday was Tuesday! Thank you to MusIQ team for making registration super easy, and to Heidi Weaver for being so fabulous with the kids!”

-Tammy Miller Richards, MusIQ Club Parent

“My son is currently enrolled in the MusiQ program at Sacred Heart. He is only 4 years old and we wanted to get him involved in learning music. The program has been beyond my expectations. Right from the start, the support provided by the Director has been outstanding. He answered all my questions patiently and even delivered this great keyboard to my door.

The instructor, Jesse is extremely personable and easy to approach. You can tell he has passion for music and Joshua is always excited to be with him after school on Mondays. Having the class right at school as after school program is thoughtful and extremely convenient for us busy parents. I can see Joshua’s progress at home when I have the chance to experience with him this amazing program that is very comprehensive. He learns all elements of music from the masters (Bach, Beethoven and I am sure many more) in a very clever software that is a lot of fun for both child and parent.

I hope that Joshua continues to grow with the program until its completion.

Thank you so much for offering an amazing product and service.”

-Steve French, MusiQ Club Parent
